

System-Wide Voluntary Curtailment Issued for Electric Generation

Cold temperatures across the region have significantly increased demand for natural gas. Effective 16:00 until 23:00 PCT December 28, 2018, SoCalGas is issuing a system-wide voluntary Curtailment order for electric generation customers in accordance with the [Aliso Canyon Withdrawal Protocol](#). SoCalGas is coordinating with the Balancing Authorities to limit and/or reduce demand in order to effectuate the voluntary curtailment.

In addition, with the current forecasted weather, SoCalGas is asking customers to conserve natural gas where possible.

All noncore customers should continue to monitor ENVOY at www.socalgasenvoy.com/ for further updates.

Please contact your Account Representative or the Gas Scheduling Helpline if you have any questions.
